

Site Visit to Saad Buildings under construction at Ponda, Goa

A site visit to Saad Buildings under construction by M/s Saad infrastructure India Pvt. Ltd was conducted for the second year Civil engineering students on 18th January 2020.

The above project is a residential project and located at plot no 7 of survey No 215 at Bandora village of Ponda. The total cost of the project is about INR 60 Crores. Details about the project were explained to the students by the Site Engineer.

The site visit helped the students in better understanding of intricacies involved in construction works. As the building was under initial stage of construction, the students could relate the theoretical knowledge with the works going on site such as - Footings, masonry works, identification of construction materials, etc.

The workers working in the site were kind enough in sharing their skills to students by way of checking the level of works by spirit level instrument, checking masonry verticality by Plumb Bob Tool, etc.
