

ONLINE LECTURE SERIES FOR STUDENTS ON ADVANCEMENTS AND TRENDS IN CIVIL ENGINEERING

The online lecture series on Advancements and trends in Civil Engineering in association with Civil Engineering students' council was inaugurated by our Honorable Director, Prof. Dr. Gopal Mugeraya on 05/07/2021 at 10:00 am Dr. Premanand Shenoy, Founder, Chief Consultant & Managing Partner at Roy & Shenoy delivered the keynote address. Dr. Sreeraj E S, HoD, presided over the function. The event was conducted on Google meet and consisted of faculty members, students and technical staff of Civil Engineering department. The Coordinator of the event was Dr. Harish N and Co-coordinator was Dr. Harikumar M.

The main aim of this lecture series is to impart knowledge to students on the latest advancements and various trends related to Civil Engineering field.

A few snapshots of the event are given below:

Dr. Premanand Shenoy conducted a lecture on “*Introduction to Structural Engineering*”. He spoke about the load path priorities and the associated risk involved. Intelligent structures with smart materials like sensors, communicators, analysers, decision makers and activators were discussed in detail. He also spoke about the globalization in regards to standarization of materials, safety factors, design codes, sharing of research findings and licensing.
