

Two Day student training program on Midas Gen

Two days Midas Gen training program was conducted for the third year and final year students on 31st March -1st April 2022 from 10:00 am to 5:00 pm, at the CAD-CAM laboratory. The forenoon session included the detailed explanation of the software capabilities and the afternoon sessions consisted of the hands-on practice session of the software.

Midas Gen is a program for structural analysis and optimal design in the civil engineering and architecture domains. Structural analysis and design can be accurately completed within the shortest possible time. Understanding the software will make the students industry-ready and equip them with the necessary technical skills required for their career.

A few snapshots of the training program are given below.
